

Environmental & Sustainability Policy

1. Introduction

- 1.1. Rise is committed to the concept of sustainable development, i.e. meeting the needs of the present without compromising the ability of future generations to meet their own needs. Concern for the environment is an integral and fundamental part of this commitment. The aim of this Environmental & Sustainability Policy is to help us in our commitment to reduce the impact on the environment from our own operations as an organisation.
- 1.2. In addition, as part of a wider network of Active Partnerships across England, this policy also highlights our commitment to build a movement for environmental sustainability.
- 1.3. Our 2021-2031 Rise Together Strategy was refreshed in 2025 and now involves a strategic focus on environmental sustainability, ensuring that in the North East, physical activity is supporting the drive to reduce the rate of global warming and limit climate change.
- 1.4. We have identified the following key environmental aspects that contribute to our environmental and carbon footprint:
 - 1.4.1. Consumption of electricity, gas and water;
 - 1.4.2. Transport emissions;
 - 1.4.3. Waste generation; and
 - 1.4.4. Procured goods and services with their own environmental impact.

 - 2.1.1. promote responsibility for the environment within the organisation and communicate and implement this policy at all levels within the workforce;
 - 2.1.2. monitor, manage and aim to reduce our use of energy and other resources, including Scope 3 emissions;
 - 2.1.3. minimise waste by reduction, re-use and recycling methods;

 - 2.1.5. ensure environmental, including climate change, criteria are taken into account in the procurement of goods and services;
